4.2. Most important symptoms and effects, both acute and delayed:

| | |
|-------------|---|
| OVERVIEW: | Effects of exposure (inhalation, ingestion or skin contact) to substance may be delayed. Reproductive or genetic defect hazard. Exposure to solvent vapor concentrations from the component solvents in excess of the stated occupational exposure limits may result in adverse health effects such as mucous membrane and respiratory system irritation and adverse effects on the kidneys, liver and central nervous system. Symptoms include headache, nausea, dizziness, fatigue, muscular weakness, drowsiness and in extreme cases, loss of consciousness. Repeated or prolonged contact with the preparation may cause removal of natural fat from the skin resulting in dryness, irritation and possible non-allergic contact dermatitis. Solvents may also be absorbed through the skin. Splashes of liquid in the eyes may cause irritation and soreness with possible reversible damage. See section 2 for further details. |
| INHALATION: | Fatal if inhaled. May cause damage to organs |
| EYES: | Causes serious eye damage |
| SKIN: | Toxic in contact with skin. May cause an allergic skin reaction. Causes severe skin burns and eye damage. |
| INGESTION: | Harmful if swallowed |

5. Fire-fighting Measures

5.1. Extinguishing Media:

Dry chemical, foam, carbon dioxide and water fog

5.2. Special hazards arising from the substance or mixture:

| | |
|---|--|
| - | May form formaldehyde gas, carbon oxides, hydrogen, formic acid and various hydrocarbons. Incomplete combustion may also produce irritating smoke and toxic and/or irritating gases or fumes |
| - | Obtain special instructions before use |
| - | Do not handle until all safety precautions have been read and understood |
| - | Keep away from heat / sparks / open flames / hot surfaces – No smoking |
| - | Use explosion-proof electrical / ventilating / light / equipment |
| - | Avoid breathing dust / fume / gas / mist / vapors / spray |

5.3. Advice For Fire-Fighters:

| | |
|---|---|
| - | Wear positive pressure self-contained breathing apparatus (SCBA) |
| - | Wear chemical protective clothing that is specifically recommended by the manufacturer. It may provide little or no thermal protection |
| - | Structural firefighters' protective clothing provides limited protection in fire situations ONLY; it is not effective in spill situations where direct contact with the substance is possible |
| - | Flammable/combustible material |
| - | May be ignited by heat, sparks or flames |

5.3. Advice For Fire-Fighters (Con't):

| | |
|---|---|
| - | Vapors may form explosive mixtures with air |
| - | Vapors may travel to source of ignition and flash back |
| - | Most vapors are heavier than air. They will spread along ground and collect in low or confined areas (sewers, basements, tanks) |
| - | Vapor explosion hazard indoors, outdoors or in sewers. Runoff to sewer may create fire or explosion hazard |
| - | Containers may explode when heated |
| - | Many liquids are lighter than water |
| - | May cause toxic effects if inhaled or ingested/swallowed |
| - | Contact with substance may cause severe burns to skin and eyes |
| - | Fire will produce irritating, corrosive and/or toxic gases |
| - | Vapors may cause dizziness or suffocation |
| - | Runoff from fire control or dilution water may cause pollution |

ERG Guide No. 132

6. Accidental Release Measures

6.1. Personal Precautions, Protective Equipment and Emergency Procedures:

Water spray may reduce vapor; but may not prevent ignition in closed spaces

6.2. Environmental Precautions:

Do not allow spills to enter drains or water courses

Use good personal hygiene practices. Wash hands before eating, drinking, smoking or using toilet. Promptly remove soiled clothing and wash thoroughly before reuse.

6.3. Method and Material for containment and clean up:

Vapor is heavier than air and may flow along surface to distant ignition and source and flashback

CALL Emergency Response Telephone Number on Shipping Paper first. If Shipping Paper is not available or there is no answer, refer to appropriate telephone number listed on the inside back cover.

As an immediate precautionary measure, isolate spill or leak area for at least 50 meters (150 feet) in all directions. Keep unauthorized personnel away

Stay upwind

Keep out of low areas

Ventilate closed spaces before entering
